

**REMARKS/ARGUMENTS**

Reconsideration and withdrawal of the rejections of the application are respectfully requested in view of the amendments and remarks herewith, which place the application into condition for allowance. The present amendment is being made to facilitate prosecution of the application.

**I. STATUS OF THE CLAIMS AND FORMAL MATTERS**

Claims 1 and 3-8 are pending in this application. Claim 1 is independent. Claims 1 and 3 are hereby amended. Claims 9-15 are hereby canceled without prejudice or disclaimer of subject matter. No new matter has been introduced by this amendment. Changes to claims are not made for the purpose of patentability within the meaning of 35 U.S.C. §101, §102, §103, or §112.

**II. 35 U.S.C. § 103(a) REJECTIONS**

Claim 1 was rejected under 35 U.S.C. § 103(a) as allegedly unpatentable over U.S. Patent No. 5,311,286 to Pike in view of U.S. Publication No. 2003/0210329 to Aagaard, et al.

Claims 3, 5, 6, and 8 were rejected under 35 U.S.C. § 103(a) as allegedly unpatentable over U.S. Patent No. 5,311,286 to Pike in view of U.S. Publication No. 2003/0210329 to Aagaard, et al. and further in view of U.S. Patent No. 6,841,963 to Song, et al.

Claim 4 was rejected under 35 U.S.C. § 103(a) as allegedly unpatentable over U.S. Patent No. 5,311,286 to Pike in view of U.S. Publication No. 2003/0210329 to Aagaard, et al. and further in view of U.S. Patent No. 5,384,431 to Tusques, et al.

Claim 7 was rejected under 35 U.S.C. § 103(a) as allegedly unpatentable over U.S. Patent No. 5,311,286 to Pike in view of U.S. Publication No. 2003/0210329 to Aagaard, et al. and further in view of U.S. Patent No. 6,850,024 to Peless, et al.

Claim 1 recites, *inter alia*:

“...wherein said robot includes a ground-contact portion for contact with a floor face, and

wherein an indicator indicates a place on said surface portion where said ground-contact portion of said robot is placed.” (emphasis added)

As understood by Applicants, U.S. Patent No. 5,311,286 to Pike (hereinafter, merely “Pike”) relates to optically measuring the roughness or another dimension of a surface by transmitting a beam of light through a grating member at an angle of incidence relative to the grating member.

As understood by Applicants, U.S. Publication No. 2003/0210329 to Aagaard, et al. (hereinafter, merely “Aasgaard”) relates to a multiple camera video system. The cameras are remotely controlled in a master-slave configuration. A camera operator at a master pan head selects one of the cameras as the current master and utilizes the master pan head to adjust the telemetry and zoom of the master camera to follow a target object. The telemetry and zoom parameters are then used to calculate corresponding telemetry, zoom, and other parameters for each of the other cameras.

Applicants submit that nothing has been found in Pike or Aagaard, taken alone or in combination, that would teach or disclose the above-identified features of claim 1. Specifically, Applicants submit that Pike and Aagaard failed to teach or suggest that said robot includes a ground-contact portion for contact with a floor face, and wherein an indicator

indicates a place on said surface portion where said ground-contact portion of said robot is placed, as recited in claim 1.

Therefore, claim 1 is patentable.

### **III. DEPENDENT CLAIMS**

The other claims in this application are each dependent from one or another of the independent claims discussed above and are therefore believed patentable for the same reasons. Since each dependent claim is also deemed to define an additional aspect of the invention, however, the individual reconsideration of the patentability of each on its own merits is respectfully requested.

### **CONCLUSION**

In the event the Examiner disagrees with any of statements appearing above with respect to the disclosures in the cited reference it is respectfully requested that the Examiner specifically indicate those portions of the reference providing the basis for a contrary view.

Please charge any additional fees that may be needed, and credit any overpayment, to our Deposit Account No. 50-0320.

In view of the foregoing amendments and remarks, it is believed that all of the claims in this application are patentable and Applicants respectfully request early passage to issue of the present application.

Respectfully submitted,  
FROMMER LAWRENCE & HAUG LLP
